

Lloyd's Register - BIM Level 2 Accreditation

The UK Government now requires all public construction projects to be performed by 'BIM Ready' organisations. The mandate has brought about an increased awareness and an appreciation of the benefits associated with its adoption. With many organisations already on their road to BIM Level 2 compliancy, certification provides a way of underlining that investment and offers some of the following key advantages:

- Evidence of an organisation's capability of undertaking BIM Level 2 projects
- Enhancement of your organisation's reputation
- Reduced time & cost associated with responding to tenders
- Win more business through marketing your capability

Excitech are working in partnership with **Lloyd's Register** in the delivery of a BIM accreditation process that certifies organisations involved throughout the design and construction process as 'BIM Ready'.

Certification demonstrates compliancy to a number of specific standards e.g. **ISO 19650-1** and **ISO 19650-2**. The following bullets provides an insight into the areas reviewed, although further detailed information is available upon request.

- Assessment of Organisation & Structure
- Assessment of HR, Training & Competency
- Assessment of Configuration Activities
- Assessment of Procurement & Subcontracting
- Assessment of Risk Management
- Assessment of Process Control
- Assessment of Process Monitoring & Improvement

About Lloyd's Register

Lloyd's Register (LR) is a global engineering, technical and business services organisation wholly owned by Lloyd's Register Foundation, a UK charity dedicated to research and education in science and engineering.

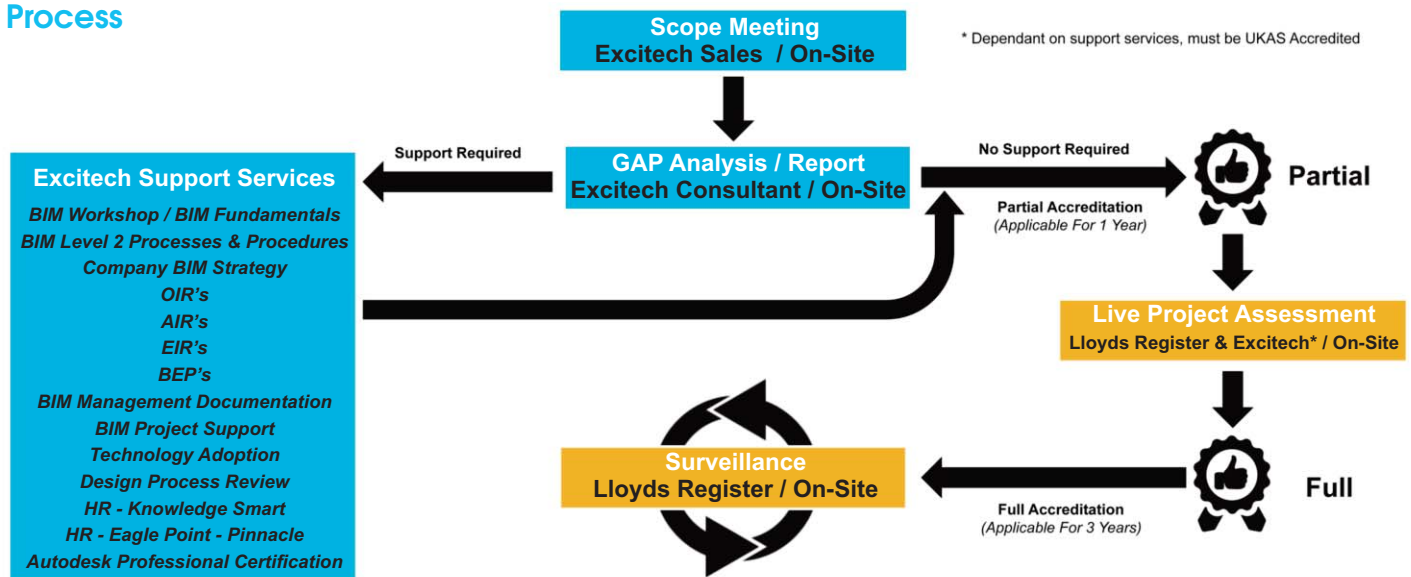

LR has been in operation since 1760, providing over 250 years of industry experience. The organisation has significant capacity with 9,000 employees working throughout 78 countries and has a well-known reputation for integrity, impartiality and technical excellence.

Lloyd's Register - BIM Level 2 Accreditation

Just like ISO 9001, BIM Level 2 Accreditation is a quality management standard helping organisations of all sizes demonstrate they deliver a consistently high level of professional service. In fact, if you already have ISO 9001, you'll find that some of the hard work has already been done and therefore can contribute significantly to your BIM Level 2 Accreditation.

Process

Costs

Company Type	Gap Analysis	Full Assessment inc. Report	Surveillance Day Rate
Project Delivery - Tier 1 (Lead Designers / Contractors)	£1,900	£4,275	£950
Project Delivery Provider - Tier 2 (Specialist Designers, Designers, Suppliers: 20+ BIM Specialists)	£1,900	£3,325	£950
Project Delivery Provider - Tier 2 (Specialist Designers, Designers, Suppliers: less than 20 BIM Specialists)	£1,900	£2,375	£950

All prices are indicative only, exclusive of VAT at 20% and exclude travel & expenses.

Multiple sites: Accreditation for all sites can initially be achieved from the primary site. All sites, however, will need to be assessed to maintain Accreditation.
